

A water tap is shown at the top, with a single, clear drop of water falling from its spout. The drop is perfectly spherical and is positioned directly above a glass globe. Inside the globe, a light bulb filament is visible, suggesting that the drop of water is about to illuminate the bulb. The background is a plain, light-colored wall.

Hot water accounts for about 25% of the energy bill in your house.

Save hot water, save energy, save money
